

## Mean scores of the SEI and its factors for the province, communities and subcommunities

**Table A: Mean scores and range for SEI and its factors for Alberta by community and subcommunity**

Socio-economic index (SEI) is a combined weighted measure of five factors. This table shows the mean scores for all five factors and the ranges for Alberta. It also shows lowest to highest mean scores for Alberta's early childhood development (ECD) communities and subcommunities.
